coded events per panel (alternative codings excluded)
c
Holozoa
37 proteomes, 7 events
Choanoeca
Salpingoeca
animals
Teretosporea
Fungi
40 proteomes, 14 events
Pezizomycotina
hyphal fungi
Saccharomycotina
Agaricomycetes + Dacrymycetes
Streptophyta
21 proteomes, 4 events
Klebsormidiophyceae + Phragmoplastophyta
land plants
Zygnematophyceae
Volvocales
21 proteomes, 6 events
Gonium + Volvocaceae
V. africanus/ reticuliferus
Red algae
18 proteomes, 4 events
Eurhodophytina
Florideophyceae
Stramenopiles
29 proteomes, 7 events
PX clade
Fucophycidae
Amoebozoa
25 proteomes, 3 events
Dictyostelia
Myxogastria + Ceratiomyxa
Cyanobacteria
36 proteomes, 9 events
Nostocales
branching Nostocales
Oscillatoriales
origin
to complex (animals: from unicellular)
confirmatory simple → complex
reversal
